

Sharing Your Electrical Usage Data

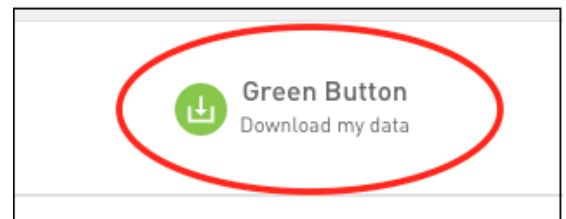

The first step to determining your solar system size is to analyze your historical electrical usage and bill. This data is readily available through your online account with PG&E by following the instructions below:

1. Go to PGE.com, and log-in to your online account.

Click on Energy Usage Details.

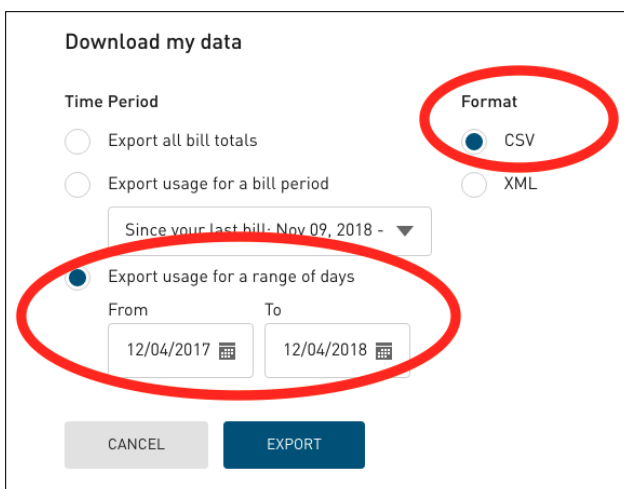

2. From My Energy Use, click on the Green Button “Download My Data” at the bottom right of the screen.

3a. If you have a Smart Meter, select “Export usage for a range of days,” and input the date range of the last 12 months.

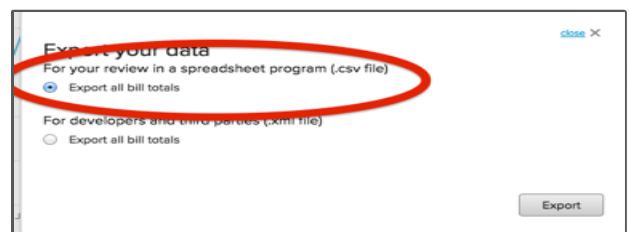

Click Export. Save the file to your computer.

• OR •

3b. If you do not have a Smart Meter, select “Export all bill totals.”

Click Export. Save the file to your computer.

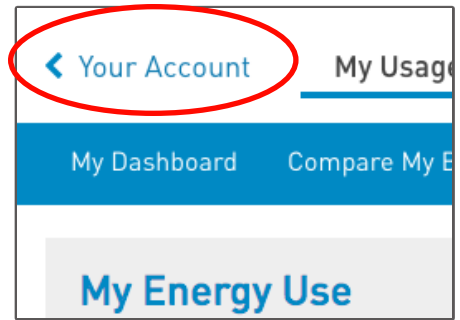

Continue to Page 2

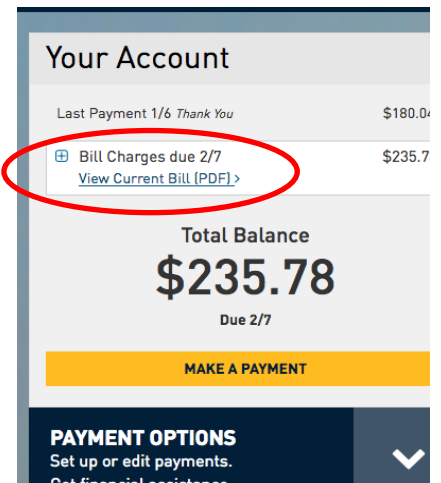

Now, please send us a copy of your bill.

4. Still on PGE.com, go back to your account dashboard, and click on “Your account”

5. Select “View Current Bill [PDF].”

Save to your computer.

6. Attach both files to an email to your contact at Solar Works or info@solarworksca.com.

You are done, thank you. This data helps us figure out what your best options are.
